HERMANN GLIEME, INC.,

Importers of Seeds, Bulbs & Plants

CHICAGO

1824 Foster Ave.

Tel: Longbeach 6423

TO OUR CUSTOMERS:

It is with great pleasure that we are sending to our customers this new catalog, and we beg to tender thanks to old customers who have shown their approval of the quality of our seeds and our methods of serving them by repeated orders.

It shall always be our endeavor to supply you with only the very best seeds from European markets and our aim is to make prices as low as is possible with high grade quality.

It is not always possible to deliver seeds at a definite date owing to the fact that the crops depend very much on weather conditions. In such cases a delay of necessity must occur; however, all orders will be filled as quickly as possible. We guarantee our stock absolutely fresh and for this reason of superior germinating qualities.

Any seeds not listed in this catalog will be procured for you direct from European Seed Centers. The time required is usually from eight to ten weeks.

All prices in this catalog will be void with the issue of a new catalog.

With all thanks for past favors and soliciting your continued valued commands.

Yours very truly,

HERMANN GLIEME, Inc.

Hermann Glieme, Pres.

TERMS OF BUSINESS

PRICES

This list cancels all previous offers.

PAYMENT

We extend the usual terms of credit to regular customers and to parties known to us.

Unknown correspondents desiring to open an account will please furnish satisfactory references to parties in the trade with whom they have had credit relations, and sufficient time to make necessary investigation, otherwise cash must accompany order, if not, goods will be shipped C. O. D.

All accounts must be paid for by the first of the month following date of purchase.

POSTAGE—INSURANCE:

All seeds offered in this catalog will be delivered to your door postpaid.

We do not pay transportation charges on larger quantities to be shipped by express or freight.

All goods are offered subject to crop failures, shortages or other causes beyond our control and to being unsold on receipt of order.

HERMANN GLIEME, INC.

NOVELTIES AND SPECIALTIES FOR 1930

ACER (Japanese Maple seeds)

Should be sown in spring immediately upon the arrival of the new crop. Be careful that the seed will not dry out. Place your order early.

Acer polymorphum atropurpureum. Blood-leaved Japanese Maple. This Maple is growing in the western sections near Kobe, and in the eastern very little. The seeds are carefully selected from the proven trees. It contains about 70-80% of the Red Maple.	1 oz.	¼ lb.	½ lb.
.....	\$1.50	\$5.00	\$8.50

AZALEA AND RHODODENDRON

Experiments of B. Y. Morrison of the Bureau of Plant Industry in the growing of Azaleas and Rhododendrons from seeds having proved successful, details of the work and methods followed have been published by the U. S. Dept. of Agriculture in Circular 68—C, copies of which may be obtained without charge by florists and nurserymen who desire to make the attempt for themselves.

So generally considered difficult to start from seed that scientists in the Department had never experimented, the work was undertaken by Mr. Morrison under the stress of necessity when he found it essential that he secure a stock for breeding experiments.

Difficulty with these plants grows out of lack of understanding of the needs of the germinating and growing seedlings, it is explained by Mr. Morrison. Azaleas and Rhododendrons, as is commonly known, thrive only in acid soils. For his germination flats he mixed a soil composed of one-third sharp sand and two-thirds leaf soil, the latter made by rubbing half decayed leaves, gathered in local Oak woods, through a quarter-inch screen. In gathering the leaves, the uppermost layer of only slightly decayed leaves was discarded, as was the lower layer in which decay had gone so far as to destroy the vestiges of stems and leaf veins, only the intermediate layer being taken. With this light and friable compost, similar to the soil in which the plants grow in the woods, germination was satisfactory and this year's seeds are most desirable for planting early next Spring.

The circular consists of eight pages, giving details of the planting, culture and transplanting, and also the conditions of shade and moisture most conducive to satisfactory growth.

The new crop seed is expected to enter from Japan during March and April.

AZALEA Dilatatum. Most beautiful hardy Azalea. Reddish-purple flowers.	1 oz.	¼ oz.	½ oz.
Blossoms before leaves grow in early spring, earliest flowering of all the Azalea	\$1.00	\$2.00	\$3.50
Rhombicum. Small leaves of the above	1.00	2.00	3.50
Hinodegiri. Brilliant crimson flowers. True	1.25	2.50	4.50

AZALEA AND RHODODENDRON (Continued)

AZALEA Indicum macranthum hybrida. New hybrid hardy Azalea, most superior than any other Azalea. Keep long time and many flowers. Its colors are over 200 varieties mixed. Crimson, pink, red, carmine-red, brilliant scarlet, purple, white, variegated, margin, and white-based with single and semi-double. This plant is in evergreen similar to *A. Indica*, but little small leaf. Blooming in June.

AGAVE

Agaves are essentially fanciers' or amateurs' plants. This noble group of plants has never received the attention it deserves, and yet no genus of plants in America furnishes so many suitable decorative plants. The Agaves are not at all difficult to grow. The soil should be principally loam and sandy, and if any vegetable soil be given it should be in small quantities. Good drainage and firm potting are necessary.

Agave Americana, the Century plant, or American Aloe	100 seeds \$1.00	500 seeds \$4.00

**LARKSPUR
EXQUISITE PINK IMPROVED**

LARKSPUR

Exquisite Pink Improved.

A new strain true Exquisite Pink in color with a wonderful improved new form. An upright habit similar to our perennial Delphinium and best of all, this new improved strain comes practically 100% true. The color is a beautiful **Soft Pink Shaded Salmon**.

$\frac{1}{4}$ oz. \$.50	1 oz. \$1.75	4 oz. \$6.00
--------------------------	--------------	--------------

Exquisite Rose

A beautiful shade of rose pink, several tones deeper than **Exquisite Pink Improved** but with the same new improved Delphinium form and coming quite true.

$\frac{1}{4}$ oz. \$.50	1 oz. \$1.75	4 oz. \$6.00
--------------------------	--------------	--------------

LARKSPUR Emperor Brilliant Carmine

A delightful addition to this group, which grows only about twenty-four inches high. The color is identical to **Lustrous Carmine** in the **Tall Branching** group.

$\frac{1}{4}$ oz. \$.50	1 oz. \$1.75	4 oz. \$6.00
--------------------------	--------------	--------------

LARKSPUR White Spire

A new dazzling pure white double Larkspur with the improved upright delphinium-like habit of **Exquisite Pink Improved**. This is a welcome addition to the new group of column-like Larkspurs, as the long straight upright stem make it superior to all other white Larkspur as a cut flower.

$\frac{1}{4}$ oz. \$.75	1 oz. \$2.50	4 oz. \$9.00
--------------------------	--------------	--------------

SAINT PAULIA (Usambara Violet)

Ionantha grandiflora. A very free and large flowering stove plant of grand effect, belonging to the Gesneriaceae and requiring about the same treatment. Very dwarf; leaves small, Gloxinia-like. Flowers beautifully dark blue, resembling those of a large-flowered sweet violet.

Trade packet \$1.50 5 Trade packets \$6.50

CALCEOLARIA Hybrida Grandiflora

Albert Kent Hybrids. A fine hybrid race of Calceolarias in a mixture containing varied colorings and producing immense clusters of blooms; of compact growth. Highly recommendable. We shall be able to fill orders for next season as soon as they reach us 1 Tr. Pkt. 3 Tr. Pkts.
\$2.00 \$5.50

CINERARIA Hybr. Multiflora Nana "KENNERS IDEAL"

The plants of this new class are very dwarf and compact. Small leaves and a very large flower-head. Highly recommendable.

	1/128 oz.	1/64 oz.	1/32 oz.
Dark and Light Blue	\$2.50	\$5.00	\$10.00

Star of Love. Distinct blue, very charming, also useful as pot plant.

1/32 oz. \$.50 1/16 oz. \$1.00 1/8 oz. \$1.75

Marga Sacher. Flowers deep sky-blue, of up to 1 1/4 inch, pretty pot-plant and cut-flower.

1/64 oz. \$.75 1/32 oz. \$1.50 1/16 oz. \$2.75

Ruth Fischer. Plant of compact, robust growth; flowers very large, true forget-me-not blue. Of exceptional value for pot culture and spring bedding.

1/64 oz. \$.75 1/32 oz. \$1.50 1/16 oz. \$2.75

PYRETHRUM Ptarmicaeflorum

A wonderful new species from the high mountains of the Canary Islands. Foliage is silvery-white and carried on long stems. Useful as hot-bedding and border plant. Will grow in any soil and best on places where the plants have always the full benefit of the sun. In the late fall cut the stems back and cover with peat, pine-needles or leaves, or winter the plants under glass. They will grow again early next spring. Highly recommendable for pot-plant and cut-flower growers.

1/32oz. \$1.00 1/10oz. \$2.00 1/8oz. \$3.75

PRIMULA OBCONICA "HERMANN FASBENDER"

PRIMULA OBCONICA "HERMANN FASBENDER"

1/128 oz. 1/64 oz. 1/32 oz.

The best for market growing and flower shops. Dark brilliant-rose, large flowering, of fine compact habit, extra \$2.00 \$4.00 \$8.00

PRIMULA MALACOIDES

We take considerable pride in offering for the coming season two new *Primula Malacoides* sorts, which will not be surpassed by any other variety on the market at present. Originators seed only.

Malacoides Carminea, Waedenswiler Stock I. Carmine-red flowers, comes true from seed. Flowers measure from $\frac{1}{2}$ to $\frac{3}{4}$ inch in diameter. This variety, we are sure, will satisfy the demands of all pot-plant growers, who has been looking for a *Malacoides* variety in dark red shades.

1/128oz. \$1.25 1/64oz. \$2.50 1/32oz. \$4.50

Malacoides Gracilis, Waedenswiler Stock II.

Of compact growth. The many (20 and more) flower stems will appear all at the same time. The color of the blossoms resemble that of the *Carminea* variety. Supply is limited.

1 trade packet \$1.50

	Tr. Pkt.	3 Tr. Pkts.
Large upright flowers, varying from bright rose to dark lilac, with partly white, partly fine spotted. Foliage dark green, silver veined.	\$1.50	\$4.00

TWO FINE FORCING CALENDULAS

Improved Sensation (Campfire). This *Calendula* is of vigorous growth, the flowers born on stout stems, needing little dis-budding. The blooms are of good form and are undoubtedly larger than those of any previously introduced. The color of the petals is brilliant orange, with scarlet sheen and a full yellow center.

$\frac{1}{4}$ oz. \$1.00 $\frac{1}{2}$ oz. \$2.00 1 oz. \$3.00

Radio (New). This is a variety entirely new in *Calendula*. There have been many new *Calendulas* introduced during the past few years, but there has not been a distinct break in the formation of the flower. The flowers are globular in shape, with beautifully quilled petals. The color is a warm, deep yellow.

$\frac{1}{4}$ oz. \$1.00 $\frac{1}{2}$ oz. \$2.00 1 oz. \$3.00

Streptocarpus Hybridus

Beautiful new large flowered hybrids. Pretty colors such as Pink, Blue and White. Streptocarpus are as easily raised from seed as Primulas or Cinerarias, and sown in January or February they bloom freely the following summer and autumn.

1/128oz. \$1.50 1/64oz. \$3.00 1/32oz. \$6.00

PANSY

Glenn's World Giant Mixture

An extra early giant strain, in bloom about the same time as the Ice Pansies. The finest strain we know of—the richest, most brilliant, most unusual new colors. Enormous sized flowers which are carried on strong stems. Absolutely in a class by itself.

1/16oz. \$1.50 1/8oz. \$2.75 1/4oz. \$5.00

Japanica (Japanese Eulalia) charming giant grass, very handsome as single

	1/4 oz.	1 oz.	4 oz.
specimens	\$.30	\$1.00	\$3.50
Japanica zebrina , white-striped foliage, very ornamental	\$.40	\$1.25	\$4.25

SWEET PEA—MRS. HERBERT HOOVER “The California Blue”

This variety easily leads the way in “blues” of the Early Winter Flowering type. It is even better than the popular Blue Bird, as it combines great length of stem and vigorous growth with a true blue color. Mrs. Herbert Hoover is a uniform blue shade, thus a great improvement over all other blue varieties. The color is bright and clear, and will, therefore, be much appreciated by all growers. It was awarded the Gold Medal, two Silver Medals, and a Certificate of Merit.

1/6 oz. \$1.25 1 oz. \$2.25 4 oz. \$7.50

BLUE BONNET

An extra large, fine deep blue. The color is evenly distributed, with not the slightest trace of mauve. By careful comparison the Color and Vigor of BLUE BONNET is far superior to any other blue on the market. It has very long stems with four blossoms to a stem.

1/6 oz. \$1.25 1 oz. \$2.25 4 oz. \$7.50

SWEET PEA "BURPEE'S LAVENDER"

Vigor of growth, length of stem, size of flower, and purity of color are well combined in this Early Flowering sterling novelty. **Burpee's Lavender** is outstanding in its color class. It is a lovely light Wisteria-lavender, a color that appeals because of its rich yet soft tone. The strong growth, charming color, and bold size of the flowers make it a foremost variety for cutting.

1/4 oz. \$1.25 1 oz. \$2.25 4 oz. \$7.50

MAJESTIC ROSE

Majestic Rose. An immense, deep brilliant rose pink of the popular color of Zvolanek's Rose, but of a richer, deep tone. The color in **MAJESTIC ROSE** is more evenly diffused than in any other **Sweet Pea** in this color class and lacks the white at the base of the standard and wings which others of this color have. This improvement in color gives it a brilliance which is quite new. In **Vigor of Growth, Length of Stem, Size of Bloom, MAJESTIC ROSE** exceeds all other early Sweet Peas.

1/4 oz. \$1.25 1 oz. \$2.25

SWEET PEA "VALENCIA"

A bright orange sunproof, of slightly softer tone than Orange King but having what all other orange Sweet Peas lack. **Immense Vigor in growth length of stem and size of blooms.** Where other orange Sweet Peas throw only two and three blooms to a spray, **VALENCIA** throws three or four.

½ oz. \$1.25 1 oz. \$2.25 4 oz. \$7.50

VERBENA DWARF COMPACTA FIREBALL

A dwarf compact Verbena about six inches high literally covered with bright scarlet flowers, excellent for borders, beds, or pot plants and comes absolutely true from seed.

½ oz. \$.75 ¼ oz. \$1.50 1 oz. \$5.00

VERBENA HYBRIDA GRANDIFLORA ROYALE

This is a Verbena of enormous size, the individual florets measuring over an inch and a quarter in diameter. The color of this new variety is a rich deep royal blue with a large creamy yellow eye. A wonderful acquisition to our group of Grandiflora (Mammoth) Verbenas.

½ oz. \$.50 ¼ oz. \$1.00 1 oz. \$3.50

VERBENA HYBRIDA GRANDIFLORA ETNA

Large trusses of intense Paul Crampbell Geranium red with a small creamy yellow eye. The individual florets are over one inch in diameter.

½ oz. \$.50 ¼ oz. \$1.00 1 oz. \$3.50

VIOLA CORNUTA

G. wermig. Extra early and exceedingly free-flowering, dark blue.

1/32oz. \$.80 1/16 oz. \$1.60 ¼ oz. \$6.00

Hansa. Deep blue, free and long flowering.

1/32oz. \$.75 1/16 oz. \$1.50 ¼ oz. \$5.00

W. H. Woodgate. A great improvement on the well-known **G. Wermig.** Very rich and perpetual flowering. Pretty dark blue flowers. Highly recommendable for cut and bedding purposes. **The latest and best in Violas.**

1/32oz. \$.90 1/16 oz. \$1.80 ¼ oz. \$6.50

FERN SPORES

Tender Varieties

Spores will do about equally well in pots or pans, which should be supplied with coal cinders for drainage. Soil for sowing spores on is best composed of five parts, in the proportions of two parts good garden soil, two parts of finely screened peat and one of sharp clean propagating sand. Leaf-mold may be used instead of peat, if easier to procure. This soil should be thoroughly sterilized. Make soil level, firmly pressed and thoroughly watered with sterilized water. Three or four hours after watering will be the best time to sow spores. Do not cover spores with soil. The spore-pots or pans should be kept tightly covered. A temperature of 65° F., should be maintained in the propagating house.

ASTER

Giant Hohenzollern Aster.

This is considered the grandest aster ever introduced. Plant tall-growing branching like the Globe Aster and bearing on very long stalks flowers of mammoth size. The flowers, which may be cut with stalks of from 1½ to 2 feet in length, measure up to 8 inches across, being densely double, fine curled and bearing the greatest resemblance to a large-flowered Japanese Chrysanthemum. Unequalled as a cut flower and highly effective for tall beds and groups.

BEGONIA SEMPERFLORENS

We have always made a specialty of Begonia seeds, and have always been intent on securing the best the market affords. We wish to call attention to Begonia Glory of Erfurt Fire Sea, Zauberin, Broadcast and Rosabella.

We introduced these varieties a few years ago, and they still maintain their position as five of the very best varieties.

The best time for sowing Begonia seeds is from October to January in order to have flowering plants during the entire year. These plants always find willing buyers as they can be used for pot plants as well as for outdoor purposes.

BEGONIA SEMPERFLORENS

THE CULTURE OF THE SEMPERFLORENS

Sow the very fine seed equally and thinly into boxes, filled with solely old settled mold. The best soil is 7/8 mold mixed with 1/8 of fine sand. Before sowing the soil in the boxes must be well moistened and equally pressed. Cover the boxes with glass and spread paper over the glass. A temperature of 65 is advisable. Generally it takes about 14 days until the seeds begin to germinate. The young seedlings should be moistened moderately only. The first transplanting takes place as soon as possible. In order to further the growth it is recommendable to transplant the seedlings often into new and nutritious soil.
1/32 oz. of seed will yield about 30,000 seedlings.

BEGONIA SEMPERFLORENS BROADCAST

This Begonia is a worthy companion to the Glory of Erfurt, introduced a few years ago. These plants will grow to a height of 12 inches, branch out considerable and are profuse bloomers. The blooms grow above the dark green foliage in large clusters. Their color is a clear brilliant red. We wish to state especially that the seed of this Begonia is obtained by crossing certain other varieties and for this reason will always make plants absolutely true to color and size.

1/128 oz. \$1.50, 1/64 oz. \$3.00, 1/32 oz. \$6.00

BEGONIA SEMPERFLORENS ZAUBERIN

This Begonia belongs to the dwarf varieties and is a profuse bloomer, producing an abundance of brilliant pink colored blooms. These plants attain a height of about six inches and grow into a bushy, round-shaped plant.

The extremely large flowers are carried umbrella-like above the dainty reddish foliage which is almost covered up by the flowers. The round and brilliantly pink blooms of about 2 inch diameter remind one of the Lorraine Begonia. In all our experience covering many years we have never seen a variety that gave promise of conquering the American market.

"Zauberin" is a sport of "Fire Sea" a variety introduced by us four years ago and which was a great success. There is no doubt that "Zauberin" will be an even greater success.

1/128 oz. \$2.00, 1/64 oz. \$4.00, 1/32 oz. \$8.00

BEGONIA SEMPERFLORENS ROSABELLA

Begonia Semperf. Rosabella

Among the large assortment of Begonia Semperflorens there has been lacking up to the present time a really low growing pink variety like compacta Rosea, Berta Bofinger, Delicacta, Dornroschen. These varieties run very uneven in height and color and their flowers are rather small. After attempts at hybridizing, extending well over twelve years, a variety fast obtained that will always bloom true to name. Rosabella will attain a height of about six inches, will branch out and grow very symmetrical. It blooms profusely and the flowers are of very large size. The color of the blooms is a clear brilliant light pink. Besides border work it will be in demand for pot plants as they are perfect substitutes for Lorraine Begonias.

Chabaud's Giant Improved.

A new acquisition in the line of Carnations; coming into bloom six months from seed and continuing to bloom throughout the Summer. The plants are of robust upright habit; they form ten to twenty stalks bearing huge flowers of fine form; they come about 90% double, are quite true and are highly clove scented.

This group should not be confused with the old Chabaud type.

CACTUS

Sow in March, April or May as later sowings generally prove less advantageous and frequently cause great losses in winter.

Use shallow pans about 2 inches high and 5 to 6 inches in diameter. The bottom of these pans is filled with crocks to $1\frac{1}{3}$ its height and the other $2\frac{1}{3}$ with a mixture of soil consisting of good peat, leaf-mould and sand. With a flat piece of wood the soil is made level with the top of the pan and the seed sown evenly divided. The seed is then very moderately covered with the same mixture of soil, finely sifted. The seeds are now gently pressed in with a round piece of wood leaving room between the soil and rim of pan of about $1\frac{1}{4}$ inch. The soil may now be properly watered with a fine hose. Moistening may also be done by putting the pan into water, to half of its height, until the surface begins to get damp. The pans are then placed in frames with bottom heat of about 65 to 75 degrees and covered up to their rims with cocoanut fibre. The frame must be pretty airtight, and shaded with paper or other tin material against hot sunshine preventing the soil from drying too fast. Dry pans must be watered every day. Some varieties germinate within a few days, while others require longer, sometimes several months. Mamillarias and Echinocacti germinate quickest, whereas the Cereus, Pilocereus and Opuntia varieties require a longer time. It is essential and very important that all seeds are kept in an even temperature and even dampness, for they will then germinate best and easiest.

CINERARIA MULTIFLORA NANA

For commercial purposes the Cineraria Multiflora Nana ranks among the best. The blossoms are about an inch in diameter, and extend in large dense umbels above the delicate foliage. The plant grows very compact and for this reason requires much less space than other Cineraria plants.

The plant is not affected by rot of some of its leaves nor by damage done by snails because these leaves are replaced by new shoots without deforming the plant.

Cineraria Multiflora Nana plants reach a height of ten inches, and are considered one of the best pot plants in the market today.

If sown early enough they will bloom for Christmas, but the plants will be at their best between March and May.

CINERARIA HYBRIDA GRANDIFLORA MAXIMA

This plant attains a medium height. The large flowers in ten to twelve-inch umbels extend well over the foliage. The leaves are larger than those of Multiflora Nana, and for this reason Maxima is a more decorative plant.

It finds a very ready market for Mother's Day sales.

PANSY

ROGGLI GIANTS (Swiss Pansy)

	¼ oz.	½ oz.	1 oz.
A wonderful new class of Pansies which we highly recommend to our customers.			
The imposing 3 or 5 blotched flowers, which on long vigorous stalks surmount the strikingly large healthy looking foliage in the most graceful manner, are of enormous size, three inches and over in diameter, perfectly round form with overlapping petals.			
The beauty, brilliancy and riches of colors being the most striking—very rare and entirely new tones—never before seen in any Pansy Mixture.	\$2.00	\$3.50	\$12.00

GLIEME'S WORLD GIANT MIXTURE

	¼ oz.	½ oz.	¾ oz.
The newest and best large flowering Pansies	\$1.50	\$2.75	\$5.00

WORLD GIANT THUNDER SEA BLUE

Very large flowers. Resembling Emperor William in color.	1.50	2.75	5.00
Germania (Masterpiece). Flowers waved or curled and spotted of enormous size in beautiful color combinations, highly recommendable.	¾ oz. \$1.50	½ oz. \$2.50	1 oz. \$9.00

PANSY Giant Triumph

These plants distinguish themselves by a strong growth forming compact bushes of round shape and conspicuous large foliage. Upon strong stems the five spotted petals of a completely round form elevate themselves above the foliage with an erect posture in a graceful manner. The extremely broad petals overlap in a manner giving the flower almost the appearance of being twofold. The edge of the petals of most of the flowers is neatly curled without injuring the erect posture of the flower.

The magnificence, the luster and the richness of the colors is very conspicuous, caused by the unique and very dark red and brown tone of colors. Upon each petal of the flower appears prominently the large extremely effective dark colored spot which is oftentimes surrounded by a conspicuously glowing variously colored border.

Exposition Phantasy Himalaya

EXPOSITION PHANTASY HIMALAYA (Ice Pansy)

(Winter-Blooming Giant Pansy)

The main advantage of these Pansies over all hitherto existing ones is the extreme earliness of flowering, in connection with an unusual hardiness. In Central Germany they begin to flower in February already, even beneath the snow, are in full bloom the first part of March, at a period, where all other sorts of Pansies begin to bud only, and continue to flower until the summer.

The flowers are very large, well formed and fragrant. This new class of Pansies is deserving of the strongest recommendation for bedding and cutting.

PETUNIA GRANDIFLORA NANA

(Large flowering dwarf Petunias)

Since our dwarf Petunias have enjoyed a large demand for them for years we have deemed it advisable to introduce a low growing, large-flowered Petunia of excellent qualities. The plant will attain a height of only 8 to 9 inches, branch out considerable but will grow in close formation making unnecessary to tie them. The pretty round bushes carry their flowers well above the foliage. Their colors are white and dark purple mixed in beautiful combinations. They are suited especially for pot plant purposes or can be used in flower beds.

Trade packet, \$2.00 Five trade packets, \$8.00

PETUNIA hybrida grandiflora superbissima The largest flowered with very large, veined throat.

	1/128oz.	1/64oz.	1/32oz.

Tyruspurple, pretty	1.50	3.00	6.00
Choicest mixed (all colors)	1.50	3.00	6.00

PETUNIA HYBRIDA GRANDIFLORA SUPERBISSIMA NANA

Splendid mixture of new compact growing superbissima Petunias. The height of this strain is only 1/2 or 2/3 of that of the old class. The flowers are very large but substantial, owing to their rich undulation which renders them loose and attractive. The display of colors is an extraordinarily rich one showing all shades, some with deep dark throats as well as with the most lovely veining

1/128oz. \$2.00 1/64oz. \$4.00 1/32oz. \$8.00

WALLFLOWER (Goldlack)

Double Fruehwunder (Latest Novelty)

(Early Wonder)

Planted in January or February, these plants will bloom in June, planted in March they will bloom in July, etc. Thus, it will be seen that it is possible to have blooming plants during the entire year. It is to the best advantage to sow in June, July, August and September in order to have blooming plants outside in the fall or in the cool houses in winter or spring. Fruehwunder will grow to a height of 30 inches. It will branch out, these branches also being laden with beautiful flowers which are well suited for cut flower purposes during the cool season.

PERENNIAL - FLOWER - SEEDS

Early in May is the ideal time to begin to sow seeds of rockery plants and indeed all the hardy herbaceous sorts. Sow the seeds as evenly as possible, choosing, if possible, a day when there is not much wind. If the soil is not very fine it may be lightly tamped before the seed is sown. The covering of these seeds is a most important step; it is much easier to fail through giving too much covering than too little. Very fine seeds such as Campanulas need very little covering at all. Larger sorts such as Iberis, cover just out of sight, or with about one-eighth of an inch of very fine soil. There are some sorts of Perennial seed, which will not germinate until about 6 months or even the following spring (for instance Helleborus, Paonia, Phlox, Trollius, etc.)

We believe it is a good plan to sow the seed as soon as it arrives, even if this is midwinter. The action of the frost on many species seems to help germinate.

Apple-shaped20	1.25	2.00

CELERY

Easy Blanching (Sanford Superb)	\$.60	\$4.00	\$7.00
A new variety, resembling Golden Self Blanching, but the leaves are green and the stalks blanch white instead of yellow. It is more hardy and less liable to blight. Stalks are somewhat taller, but have the same form and heavy heart of the Self Blanching, and while maturing about two weeks after that variety, has the advantage in being an excellent winter keeper as well as an early celery. One of the easiest to blanch and of the best quality.			
Emperor, or Fordhook60	4.00	7.00
A valuable selection from Columbia. Plant quite dwarf and stocky, with large full, light yellow heart. Stalks broad, thick and crisp. Follows Self Blanching in season and is a superior sort for fall and winter use. Very tender and too brittle for shipment to distant markets.			
Giant Pascal40	2.50	4.50
A compact, vigorous, productive variety and one of the best for winter use; leaves upright, short and dark green; stalks short, thick and very broad; blanches a beautiful yellowish-white.			
Golden Plume, or Wonderful	1.25	6.50	11.00
Resembles Golden Self Blanching in appearance, crispness and fine nutty flavor, though somewhat earlier, larger and of ranker growth. Blanches quickly with a full heart and rich, golden-yellow color. Apparently more disease resistant than other yellow celeries. A very desirable sort.			
Improved White Plume30	1.60	3.00
A very early, handsome variety; leaves light, bright green; easily blanchd a beautiful silvery-white color. A popular sort for first early market.			
Pink Plume50	3.00	5.00
Quite identical with White Plume, but with stalks richly suffused with pink.			
Winter Queen25	1.40	2.50
Of medium height, broad, light green stalks; very solid and crisp; blanches well.			
Dwarf Golden Self-Blanching60	4.00	7.00
Our strain of this variety is unexcelled and absolutely reliable; this sort is without doubt the finest early celery in cultivation. Plants compact and stocky, with yellowish-green foliage; stalks perfectly solid, of fine, nutty flavor, attains a good size; blanches a handsome golden yellow color.			

CUCUMBER

Middle Sized Green Erfurt Improved, a strong grower and free bearer	\$.25	\$1.00	\$1.50
German Conquerer (Grochlitzer), very long, green fruits, a most excellent pickling sort, highly recommendable50	2.50	4.00
French Cluster (Cornichon), short green fruits, good for pickling20	1.00	1.50
Extra Early Russian Cluster, the earliest variety, hardy and productive, fruit small15	.70	1.20
Chicago Pickling (Westerfield) Cubic20	.75	1.25
A most excellent pickling sort; very uniform productive and good color. Our strain is much superior to stocks generally sold under this name.			
Boston Pickling, or Green Prolific15	.70	1.20
Fruit short, smooth, symmetrical and bright green; very productive, making a good pickle; a little shorter and thicker than most pickling sorts.			

KOHL RABI

	1 oz.	½ lb.	1 lb.
Earliest Green, or White Erfurt Dreienbrunnen, best open ground sort, extra.	\$.25	\$1.00	\$1.75
Early Purple Vienna25	1.00	1.75
Early and with small top; bulbs medium size and purple color; flesh white.			
Large Green, or White25	1.00	1.75
Quite hardy and most productive; grown mostly for stock feeding; bulbs often weigh eight to ten pounds and are of a greenish-white color.			

KALE OR BORECOLE

	1 oz.	½ lb.	1 lb.
Dwarf Curled Scotch	\$.15	\$.80	\$1.30

EGG PLANT

	1 oz.	½ lb.	1 lb.
Black Beauty Earlier and nearly as large as New York Purple; fruit very dark purple, which color it holds for a long time.	\$.50	\$3.00	\$5.50
Early Dwarf Purple The earliest Egg Plant; fruit small and ovoid-shaped, 3 to 4 inches long by 2 inches in diameter; deep dull purple in color.	.60	4.00	7.00
Early Long Purple One of the earliest, and most productive sorts; Vfruits club-shaped, 6 to 8 inches long; rich purple; fine quality.	.45	2.75	5.00
Florida High Bush Of strong, upright growth, holding its fruit well above ground; fruit similar in form and size to New York Purple, though not so dark in color.	.55	3.25	6.00
New York Improved Purple (Spineless)50	3.00	5.50

LEEK

	1 oz.	½ lb.	1 lb.
Summer (French) early, thick	\$.25	\$1.25	\$2.25

LETTUCE

	1 oz.	½ lb.	1 lb.
Large Yellow Dresden, white seeded, excellent	\$.20	\$.85	\$1.50
May King, extra early, white seeded25	1.00	1.75
Grand Rapids (Selected Stock) (B. S.)25	1.00	1.75

The favorite loose-leaved forcing lettuce, and does well in the North for early planting outside. Leaves short, spatulate in shape, excessively blistered and crumpled, and the border heavily fringed; color very light green, with no trace of brown. A most handsome and attractive lettuce of fair quality. Our stock of Grand Rapids is unsurpassed.

ONION

	1 oz.	½ lb.	1 lb.
Giant Zittau, large round yellow	\$.35	\$1.75	\$3.00
Ailsa Craig40	2.00	3.50

An exhibition variety of large size, specimens having been grown to weigh over 3 pounds each; bulbs oval-shaped with pale straw-colored skin, exceptionally mild.

PARSNIP

	1 oz.	½ lb.	1 lb.
Long Smooth White, the best and most productive of the long Parsnips	\$.10	\$.60	\$.95
Early Round White, the earliest of all Parsnips, easily grown and easily harvested.15	.75	1.25

PARSLEY

	1 oz.	½ lb.	1 lb.
Champion Moss Curled	\$.15	\$.50	\$.90

A compact growing sort; leaves are a uniform dark green color, very finely cut and so closely curled as to resemble bunches of moss; one of the most full and decorative sorts.

Large Rooted Hamburg15	.50	.90
-----------------------------------	-----	-----	-----

The edible fruits of this variety resemble a small, thick parsnip in shape and color, and are extensively used for flavoring soups and stews; leaves plain.

PEAS

(Excellent Market Varieties)

	½ lb.	1 lb.	10 lbs.
Abundance, wrinkled-seeded, a very free bearer	\$.25	\$.40	\$3.25
Belladonna, wrinkled-seeded25	.40	3.25
De Grace, round-seeded, early, excellent for forcing20	.35	3.00
Express, round-seeded, the earliest, very dwarf25	.40	3.25
Kentish Invicta, green round seeded20	.35	3.00
Saxa, very early, round-seeded25	.40	3.25
Senator, wrinkled-seeded, green, a free bearer30	.55	3.40
Telephone, a favorite variety with both home gardeners and market growers, a very free bearer, wrinkled-seeded25	.40	3.25

PEPPER

	½ oz.	1 oz.	4 ozs.
Chinese Giant	\$.40	\$.75	\$2.25

One of the very largest of the mild red varieties. Plant of short, stocky growth, with light green foliage; fruits pendent, thick, blocky, and square ended, 4 to 5 inches in diameter and of equal length; color brilliant glossy scarlet.

Pimento25	.40	1.40
----------------------	-----	-----	------

A very thick fleshed, heart-shaped, smooth, mild, crimson variety, much used for salads; fruits pendent; 3½ in. long by 2½ in., greatest diameter; rather late in season.

PEPPER (continued)

	$\frac{1}{2}$ oz.	1 oz.	4 ozs.
Early Dwarf Red Squash	\$.25	\$.50	\$1.50
A medium sized flat, or tomato-shaped variety with pendent fruit more or less ribbed, about 2 inches in diameter and one inch in depth; flesh thick and mild; color bright red.			
Harris' Earliest40	.70	2.00
The earliest pepper we are acquainted with, being earlier than Neapolitan.			
Neapolitan25	.50	1.50
A very early and productive large variety and one of the sweetest and most mild. Fruit of upright growth, four inches long and two inches thick, bright red.			
Red Chili25	.50	1.50
Of low growth, forming a spreading plant about 18 inches high; fruit usually erect, about one and a half inches long, cone shaped, bright red and very hot; exceedingly prolific; used for pepper sauce.			
Sweet Mountain, or Mammoth25	.40	1.35
Similar to Bull Nose, but more elongated; pendent fruits often grow six inches long by four inches in diameter; bright red, mild sweet.			
Oshkosh60	1.00	3.00
A very distinct, desirable, large variety. While the fruit is bright canary yellow at maturity, during growth it is an intense, deep glossy green, making an attractive sort to market as "green peppers."			

RADISH

	1 oz.	$\frac{1}{2}$ lb.	1 lb.
Express , round shaped, earliest, bright scarlet	\$.15	\$.60	\$1.00
Non Plus Ultra, or Fireball (Scarlet Button)20	.65	1.10
Round rather than turnip-shaped, of medium size with a moderate top; bright scarlet; very early, and one of the best forcing varieties, following Saxa in three to four days.			
Erfurt Scarlet Turnip , short leaved, extra for forcing15	.60	1.00
Icicle , long, white, cylindric, new. The flesh is crisp and tender even when fully developed and has an agreeable snappy flavor. Recommended for either spring or fall sowing20	.65	1.10
Wurzburg Giant (Crimson Giant), turnip-shaped, extra large, deep crimson, thin, tender skin. Intermediate in season15	.60	1.00
Saxa15	.60	1.00
The earliest of the forcing radishes, and one of the slowest to shoot to seed. Round, bright scarlet and with the smallest possible top.			

SUMMER RADISHES

Large White Summer Salvator , round; large size; skin and flesh pure white, crisp and fine. An excellent summer sort15	.60	1.00
---	-----	-----	------

FALL OR WINTER RADISHES

Long Black Spanish15	.60	1.00
One of the latest and hardiest varieties for winter use; roots 8 to 9 inches long, 2 to 3 inches in diameter and nearly black in color.			
Long White Spanish15	.60	1.00
Quite like Long Black Spanish except in color and being less pungent.			
Round Black Spanish20	.65	1.10
Roots are round, inclined to top-shape, and 3 to 4 inches in diameter; skin almost black, flesh white, crisp and pungent.			
(\$8.00 per 10 lbs. all varieties)			

SORREL

Large Leaved French	1 oz. \$.15	$\frac{1}{2}$ lb. \$.70	1 lb. \$1.25
----------------------------------	--------------	--------------------------	--------------

SPINACH

Giant Eskimo , dark green, very hardy, excellent	$\frac{1}{2}$ lb. \$.35	1 lb. \$.50	10 lbs. \$3.75
Bloomsdale Savoy Leaved (Norfolk Savoy)35	.50	3.75
Very early and hardy, and one of the best for market and canning. Plant of upright growth with a tendency to go quickly to seed in hot weather. A fine long-season Spinach, remaining longer than most varieties before			
Long Standing Thick Leaved35	.50	3.75
A late maturing, very long standing variety; plant makes a very flat rosette, with broad arrow-shaped, nearly smooth, deep green leaves.			

SWISS CHARD

(Replaces Spinach during the hot weather)

Swiss extra curled (Lucullus)	1 oz. \$.20	$\frac{1}{2}$ lb. \$.75	1 lb. \$1.25
White, Silver or Sea-kale15	.60	1.00

TOMATO

	½ oz.	1 oz.	4 ozs.
Bonny Best	\$.25	\$.40	\$1.25
About a week earlier than Chalk's Jewel; fruit somewhat smaller, very smooth, solid and uniform, and produced in clusters in center of the plant; ripens uniformly and is very productive; color bright red.			
Chalk's Jewel30	.50	1.50
An exceptionally fine early variety, about ten days later than Earliana; fruit uniformly smooth, round and solid; color crimson; a good canning sort for the North.			
Dwarf Stone30	.50	1.50
The best dwarf tomatoes; fruits large, smooth, round, very solid and of a deep scarlet color.			
Earliana (Spark's)25	.40	1.50
The earliest and best of the very early tomatoes; very productive for an early sort; fruit of fair size, round, very smooth and solid, and produced in clusters in center of the plant; color bright scarlet. Our many years of selection on this stock have made it unequalled today.			
Early Detroit30	.50	1.50
A very fine early, large-fruit, purple variety; a little larger than Beauty, and somewhat earlier; fruits nearly globe-shaped, smooth and solid.			
Greater Baltimore25	.40	1.20
A main crop, productive, red fruited variety of the Matchless type; quite popular with the canners.			
John Baer, an early, productive, red tomato on the order of Chalk's Jewel25	.40	1.20
Matchless, a very dependable, large, smooth, second early sort, makes good canning variety, color cardinal red25	.40	1.20
Ponderosa, an exceptionally large, purple-fruited tomato, and for home use one of the best; fruit very solid, with few seeds. Smooth with a delicious sub-acid flavor40	.65	2.00
Red Head (New)35	.60	1.80
Red Rock20	.35	1.10
A very fine selection of the Matchless type; medium early, round, smooth and bright red; makes a good canning variety.			
Royal Purple25	.40	1.20
Stone25	.40	1.20
Trucker's Favorite35	.60	1.80
A popular purple-fruited sort on the order of Beauty and of the same general habit of growth; the fruit is, however, more flat.			
Yellow Cherry	\$.20	\$.35	\$1.10
For preserves; similar to Red Cherry except in color.			

TURNIP

	1 oz.	½ lb.	1 lb.
Early White Flat Dutch	\$.15	\$.45	\$.75

Wormwood. Has medicinal qualities; splendid for poultry			

ORIGINAL S. KUNDE & SOHN

DRESDEN, GERMANY

Florist Knives

Nursery Knives

and Shears

KUNDE Knives and Shears are hand forged from the finest steel and are guaranteed as near PERFECT as tools can be made.

The Knives are known the world over for the wonderful edge they hold—due to the hardness of the steel and tempering, the correct bevel, ebonite or full shaped wood handles, large brass rivets, and extra heavy brass linings.

In Shears Kunde originated the double-cut principle; the cut coming from both sides is easier and does not require finishing with a knife for proper healing. The large bolt with security plate and the method of closure which does not allow pinching of the hand, are also distinctive features.

You will find these knives and shears to be most satisfactory not only for the way they do their work, but for the way they hold their cutting edges and their long life in continued service.

SHARPENING OF KNIVES

We recommend a Belgian Oil Stone. Whet circularly towards the edge with the blade flat and maintaining a pressure on the edge without lifting the back. Continue repeatedly on both sides until particles of steel appear on the edge. Remove these by drawing diagonally across the stone very lightly, lifting a little the back of the blade.

BUDDING KNIVES

No. 351. For trees and roses, 8 cm., \$1.50 ea.

No. 31A. For trees and roses, 10 cm. Strong brass lined Ebonite handle. \$2.00 ea.

No. 41H. A finely polished budding knife of buffalo horn and brass lining, 10½ cm., \$2.50 ea.

No. 22H. Of buffalo horn and brass lining 10½ cm., \$2.50 ea.

No. 23H. Same material, 10½ cm., \$2.50 ea.

No. 131P. For budding and pruning. 10½ cm., \$3.00 ea.

No. 123M. 10½ cm., \$3.00 ea.

GRAFTING KNIVES

No. 21A. For camellias, azaleas, etc. Ebonite handle. 10 cm., \$2.00 ea.; 10½ cm., \$2.25 ea.

No. 22A. Blade more pointed. 10½ cm., \$2.00 ea.

No. 23A. For vine, rose and tree grafting. 10 cm., \$2.00 ea.

No. 24C. Curvated extra strong handle. 10½ cm., \$2.25 ea.

No. 10. Pen knife with horn covering. Very fine finished. 9 cm., \$3.25 ea.

No. 66. Pen Knife with stage handle and steel bolster. Very strong. 11 cm., \$3.00 ea.

PRUNING KNIVES

No. 1C. Curvated handle and wider blade 11 cm., \$2.25 ea.

No. 2E. Wood handle, easily fitting the hand or pocket. Strong brass lining and large rivets. 12 cm., \$2.75 ea.

No. 1N. Strong brass lining, wood handle. Covered with brass on end. 12 cm., \$3.75 ea.

No. 4123R. For budding and pruning. 10 cm., \$3.00 ea.

No. 1A. Straight flat ebonite handle, thin, blade. 10½ cm., \$2.25 ea.

No. 2G. Straight handshaped handle, narrow blade. For dividing plants, tubers, etc. 11½ cm., \$2.75 ea.

No. 2H. Stag handle, iron, lining and steel bolsters. 10½ cm., \$4.50 ea.

No. 411R. Ebonite handle and brass lining. For budding and pruning. 10 cm., \$3.00 ea.

No. 3000. A heavy multi-bladed knife. Ebonite covering. 10½ cm., \$4.00

NORMAL DOUBLE CUT PRUNING SHEARS

No. 135. Model 1879. Powerful double-edged Pruning Shears for trees and roses. Brass security plate for nut, both edges forged of best crucible steel. 20 cm., \$6.00 ea.

No. 138. Slender points and heavy frame, with draw-cut, obtained by placing bolt off center. Rubber covered handles. 20 cm., \$7.50 ea.

SINGLE EDGED PRUNING SHEARS

No. 134. Model 1879. A strong moderately priced shears. Brass security plate for nut, both edges forged of best crucible steel. 20 cm., \$5.25 ea.

No. 124. Security plate for nut and leather closure. For general use. 20 cm., \$2.50 ea.
